

Amendments to the Specification

Please amend paragraph number 0025 as follows:

In addition, as shown in Figure 4, the first portion 40 has a first height H_1 and the second portion 42 has a second height H_2 smaller than the first height H_1 . In particular, as shown, the first 40 and second 42 portions have a first height H_1 that is substantially uniform between the base and a top of the first portion 40. The second portion 42 has a second height H_2 that is substantially uniform between the base and a top of the ledge 48. Preferably, the first height H_1 is 3 to 5 times larger than the second height H_2 . The first height H_1 can range from 10-50 mm and the second height H_2 can range from 2-10 mm. Of course, any suitable height of the first 40 and second 42 portions can be utilized depending upon the desired application.
